

Ravi Avancini

AI Automation Engineer · n8n · LLM Workflows · Browser Automation

ravi.avancini@gmail.com · linkedin.com/in/raviavancini · github.com/r4vsdev · Remote from Brazil, open to relocation

SUMMARY

I turn manual business processes into reliable automations: n8n workflows, LLM-powered scoring and generation, browser automation and the small apps that tie them together. I design for failure (kill switches, error alerts, retries, idempotency) because silent failures cost more than the work they replace. Former mechanical design engineer; I work directly with non-technical owners from discovery to delivery.

EXPERIENCE

Freelance AI Automation & Web Developer · Self-employed

2024 – Present · Remote

- **Lead generation automation:** my own client acquisition pipeline from LinkedIn Sales Navigator and Google Maps through Clay enrichment, AnyMailFinder, AI-personalized copy and Instantly campaigns, orchestrated in n8n.
- **AI support and scheduling:** 24/7 assistants built with Voiceflow, n8n and LLMs that answer in the company's tone and book appointments.
- **Law firm, Vitória, Brazil (2026):** recovered a lost domain, migrated DNS from AWS Route 53 to Cloudflare, separated web and Google Workspace email to fix deliverability, and rebuilt the site from ~5s to sub-1s load. Delivered a plain-language report to the partners.
- **Atlanta remodeling company (2025):** built the first website with lead capture and launched Google Ads; inbound calls on day one.

SELECTED BUILDS

Creator program automation: six n8n workflows behind a live demo page · [GitHub ↗](#)

- Apify discovery, OpenAI brand-fit scoring, Airtable CRM sync, onboarding, contract PDFs, reminders, post tracking and weekly Google Sheets reports; kill switch at every workflow's first step, global error alerts.

Outreach Center: local-first app for email campaigns, AI phone calls and social publishing · [GitHub showcase ↗](#)

- Crash-safe background workers, at-most-once email delivery, IMAP reply and bounce classification, Vapi call sync, publishing to X / Facebook / Instagram / TikTok. TypeScript, Fastify, tRPC, SQLite, React; 122 tests.

AI outbound caller: Vapi voice agent fed by an n8n lead pipeline (pre-launch)

- Google Places scrape with a monthly API budget guard, per-lead call variables, call polling, transcript analysis and retries, results written back to Google Sheets.

Content automation: AI-generated content pipelines

- Trend detection → AI scripts → Veo 3 video → auto-publishing; an Instagram studio where Claude writes copy, Gemini generates images via Playwright-driven Chrome, and editor feedback is distilled back into the prompt.

PRIOR EXPERIENCE

Mechanical Design Engineer · Vale (mining & infrastructure)

2019 – 2021

- Applied research on autonomous railway inspection; co-developed a patented autonomous inspection vehicle; led mechanical design work in cross-functional teams.

SKILLS

Automation	n8n (loops, sub-workflows, error workflows, data tables), Zapier, Make, webhooks, REST APIs
AI	OpenAI and Claude APIs, prompt design, LLM scoring and structured output, Vapi, Voiceflow
Data & tools	Airtable, Google Sheets / Drive APIs, Apify, Clay, Instantly, SQLite
Engineering	TypeScript, Node.js, React, Playwright, Cloudflare, Netlify
Languages	Portuguese (native), English (fluent)

EDUCATION

B.Eng. Mechanical Engineering, IFES (Instituto Federal do Espírito Santo) · 2016 – 2021

Full-stack web development, The Odin Project (Ruby, Rails, JavaScript) · 2022 – 2023
