

Ravi Avancini

GTM Engineer · Outbound Automation · AI Voice Agents

ravi.avancini@gmail.com · linkedin.com/in/raviavancini · github.com/r4vsdev · Remote from Brazil, open to relocation

SUMMARY

I build the systems that find, contact and convert customers: lead sourcing and enrichment, cold email infrastructure, AI voice agents and the CRM plumbing between them. I have run outbound campaigns myself since 2024 and built my own multi-channel outreach platform with reliability guarantees most tools skip. Former mechanical design engineer, comfortable owning a system end to end and explaining it to non-technical stakeholders.

EXPERIENCE

Freelance AI Automation & Web Developer · Self-employed

2024 – Present · Remote

- **Outbound pipelines:** built and ran my own client acquisition end to end: prospect lists from LinkedIn Sales Navigator and Google Maps, enrichment in Clay, email finding with AnyMailFinder, AI-personalized copy, and campaign delivery through Instantly, orchestrated in n8n.
- **Paid acquisition, Atlanta remodeling company (2025):** built the company's first website with lead capture and launched its Google Ads campaign; the client received inbound calls on day one.
- **Law firm, Vitória, Brazil (2026):** recovered a lost domain, migrated DNS from AWS Route 53 to Cloudflare, separated web and Google Workspace email to fix deliverability to courts and partners, and rebuilt the site from ~5s to sub-1s load with prerendering for local SEO. Delivered a plain-language report to the partners.

SELECTED BUILDS

Outreach Center: local-first outbound platform: email, phone and social in one app · [GitHub showcase](#) ↗

- Instantly-style email: account rotation and daily limits, multi-step sequences with A/Z variants and spintax, schedules per timezone, threaded follow-ups, reply / auto-reply / bounce detection over IMAP, unified inbox, lead statuses and per-step analytics.
- At-most-once sending (a crash never produces a duplicate cold email), email finder and verifier, Vapi call analytics, social publishing. TypeScript, Fastify, tRPC, SQLite, React; 122 tests incl. real-SMTP integration.

AI outbound caller: Vapi voice agent that offers local businesses a free audit by phone (pre-launch)

- n8n pipeline: Google Places lead scrape with a monthly API budget guard, email enrichment, a dialer that injects per-lead variables, polls each call, analyzes the transcript and writes accepted / rejected back to the sheet, with retries for leads never reached.

Creator program automation: n8n workflows for an influencer program, behind a live demo page · [GitHub](#) ↗

- TikTok creator discovery (Apify) with AI brand-fit scoring, Airtable CRM sync with dedupe, onboarding, contract PDFs, posting reminders, performance tracking and weekly Google Sheets reports.
- Kill switch, global error alerts and access-keyed webhooks.

PRIOR EXPERIENCE

Mechanical Design Engineer · Vale (mining & infrastructure)

2019 – 2021

- Applied research on autonomous railway inspection; co-developed a patented autonomous inspection vehicle; led mechanical design work in cross-functional teams.

SKILLS

GTM & outbound Clay, Instantly, LinkedIn Sales Navigator, AnyMailFinder, Apify, Google Maps / Places, cold email deliverability (SPF, DKIM, DMARC), Google Ads

Automation & AI n8n, Zapier, Make, OpenAI and Claude APIs, Vapi, Voiceflow, webhooks, REST APIs

Data & CRM Airtable, Google Sheets, SQLite

Engineering TypeScript, Node.js, React, Playwright, Cloudflare, Netlify

Languages Portuguese (native), English (fluent)

EDUCATION

B.Eng. Mechanical Engineering, IFES (Instituto Federal do Espírito Santo) · 2016 – 2021

Full-stack web development, The Odin Project (Ruby, Rails, JavaScript) · 2022 – 2023
